SUMMARY

Final-year B.E. student in Artificial Intelligence & Data Science with **4 internships** across full-stack and AI development. Proficient in **MERN stack, React, Python, Machine Learning, and NLP**. Built production-grade applications using Firebase, OpenCV, and REST APIs. Seeking fresher/entry-level roles in **AI/ML, Full-Stack Development, or Data Science** — remote or India-based.

EDUCATION

Konkan Gyanpeeth College of Engineering

Bachelor of Engineering – Artificial Intelligence and Data Science | **CGPA: 8.2/10**

Karjat, Maharashtra

2022 – 2026

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, SQL, HTML5, CSS3, TypeScript (Basic)

Frontend: React.js, Next.js (Basic), Bootstrap, Tailwind CSS, Material UI, Figma

Backend: Node.js, Express.js, Django, REST APIs, JWT Authentication, WebSockets

Full-Stack / Databases: MERN Stack, Firebase, Firestore, MongoDB, PostgreSQL

AI / ML / Data Science: Machine Learning, Deep Learning, NLP, OpenCV, Pandas, NumPy, Scikit-learn, TF-IDF

Data Analytics: EDA, SQL, Excel, Power BI (Basic), Data Visualization

Tools & DevOps: Git, GitHub, VS Code, Postman, Vercel, Netlify, Docker (Basic)

EXPERIENCE

Full-Stack Developer Intern

Jul 2025 – Nov 2025

NullClass

Remote

- Developed a scalable **YouTube-like video platform** using React, Node.js, Express, and MongoDB, supporting video upload, comments, subscriptions, and watch history for 500+ users.
- Implemented **JWT-based authentication** and role-based access control, reducing unauthorized access by design and improving platform security.
- Optimized **10+ REST APIs** and improved frontend rendering performance using React lazy loading and memoization, reducing average response time by **30%**.

Frontend Developer Intern

Jan 2024 – Apr 2024

Bluebricks

Remote

- Built a **responsive Personal Finance Tracker** using React, Firebase, and Cloud Firestore with real-time budget tracking for income, expenses, and category-based insights.
- Designed **interactive dashboard components** with analytics charts using Material UI and Figma prototypes, improving user engagement by **40%**.
- Ensured **full mobile responsiveness** across all screen sizes, reducing UI-related bug reports by **60%**.

Web Developer Intern

May 2024 – Aug 2024

Learnstriks

Remote

- Built **dynamic, mobile-responsive websites** using HTML, CSS, JavaScript, and Bootstrap, serving **5+ client projects** successfully.
- Integrated **REST APIs** for real-time data rendering and implemented SEO best practices, **reducing page load time by 35%**.
- Delivered optimized, cross-browser compatible pages, increasing content discoverability by **25%** through structured metadata.

Software Developer Intern

Jun 2023 – Sep 2023

Bluestock

Remote

- Developed a **stock-market information platform** with IPO listings and company insights using Node.js, Express, and REST APIs, serving real-time financial data.
- Implemented **CRUD APIs with authentication modules**, enabling secure data management across the platform for **100+ users**.
- Collaborated with team via Git using **modular and scalable code architecture**, maintaining clean version history across **20+ commits**.

PROJECTS

- Fake News Detection System** | *Python, NLP, Scikit-learn, TF-IDF* | [GitHub](#) 2025
- Built an **NLP-powered fake news classifier** using Logistic Regression, Random Forest, and SVM, achieving **94% classification accuracy** on benchmark datasets.
 - Applied **TF-IDF vectorization, text preprocessing, lemmatization, and stopwords removal** for robust feature engineering pipeline.
 - Developed a **real-time UI** for news classification, enabling end-users to verify content instantly with sub-second response time.
- Full-Stack Event Management Platform** | *MERN Stack, WebSockets, Bootstrap* | [GitHub](#) 2024
- Developed a **full-stack event management system** with event creation, attendee tracking, and user authentication using the MERN stack.
 - Implemented **WebSocket-based real-time notifications** for live event updates and attendee alerts, improving event discoverability by **50%**.
 - Built **responsive UI** with advanced search and filter functionality supporting **10+ filter categories**.
- Personal Finance Tracker** | *React, Firebase, Firestore* | [GitHub](#) 2024
- Built a **real-time finance management platform** for tracking income, expenses, and budgets with Firebase Authentication and Firestore sync.
 - Designed **reusable dashboard components** with chart-based insights for category-wise spending analysis across **8+ expense categories**.
- Emotion-Based Music Recommendation System** | *Python, OpenCV, ML* | [GitHub](#) 2025
- Built a **facial emotion detection model** using OpenCV and ML to recommend context-aware music playlists in real time across **6 emotion categories**.
- Construction Business Website** | *HTML, CSS, JavaScript, Bootstrap* | [GitHub](#) 2025
- Developed a **fully responsive client-facing construction business website** with service listings, project portfolio, and contact form integration.
 - Implemented **mobile-first design** using Bootstrap and custom CSS, ensuring seamless experience across all devices and screen sizes.
 - Delivered production-ready website to a **real client**, demonstrating ability to translate business requirements into functional web solutions.

CERTIFICATIONS

Full Stack Web Development – NullClass (2025)
Frontend Development with React – Udemy (2024)
Python for Data Science – Udemy (2024)
TATA Data Analytics Virtual Experience – Forage (2025)
